

1st Announcement:

Dear colleagues, dear chironomid researchers, **it is a great pleasure to officially invite you to the 22nd International Symposium on Chironomidae ISC22.**

ISC22 will take place in Niš, Serbia, **from June 17 to June 19, 2024.** The venue will be the University of Niš, Serbia.

Leaning on a 60-year tradition of the International Symposium of Chironomidae, the goal is to, yet again, bring scientists from around the world together, share our knowledge, exchange the brightest new ideas, and have fruitful scientific discussions about chironomids while having a good time. To achieve this, ISC22 will devote special attention to young researchers. With the desire to attract as many fresh faces as possible, the main event will be preceded by a three-day series of workshops (June 14 to June 16) covering morphological and molecular identification, chironomids as model organisms in ecotoxicological studies, methods in paleolimnology, as well as numerical ecology in R. Committed to overcoming the boundaries between approaches in chironomids studies, we look forward to welcoming interdisciplinary and transdisciplinary research as well. **I would be delighted to extend a special invitation to all researchers and students from Ukraine to participate in the Symposium as honored guests, with no registration fees required!**

If you have a passion for a particular area in chironomid research and if you are interested in becoming a session chair for the ISC22 Niš meeting, consider [proposing a session!](#)

Save the date to attend ISC22, and keep track of all our updates

Join us in Niš, and share the celebration of the 60th anniversary of ISC!

Fresh regards,

On behalf of the Organizing Committee

Djuradj Milošević – ISC22 Chair
